### Plan:

	Recommendation/Treatment
Physical Exam:	All aspects of the physical exam were considered within normal limits. This is great!
Nutritional Consult:	Based upon body condition score, please keep the current diet as it seems to suit him well.
Dental Exam and Float:	Dental power-float was performed to correct for the noted abnormalities, please ensure Jazz is chewing and eating normally over the next 2-3 days. If nasal discharge, change in chewing, decreased appetite, or dropping feed occurs please give us a call.
Diagnostic Blood Profile:	All values are within normal limits
ACTH/Insulin Test:	An ACTH/Insulin test was not perform, it will be done at his next visit in 6 months
Coggins:	A Coggins test was not performed, it will be done at his next visit in 6 months
Fecal Parasite Analysis:	No deworming needed at this time.
Sand Sedimentation Test:	Jazz's feces had very mild amounts of sand sedimentation. We recommend beginning a Sand Clear/Sand Rid (psyllium) regimen of double dose for 2 weeks, followed by once monthly 1 Dose, 1 time daily, for 7 days out of every month. If he is eating off of the ground we recommend a large bin feeder and/or rubber mats.
Soundness Exam:	Jazz had a mild left and right hind lameness in a straight line. If this continues, worsens, or affects his ability to perform please schedule a lameness exam for further workup. presumptive diagnosis 1. left hind and right hind TMT and DIT(Hock) joint synovitis. 2. left hind and right hind proximal suspensory desmitis based on push off lameness on lameness locator
Hoof Radiograph and Balance:	Continue with current shoeing protocol
Vaccination:	Jazz was vaccinated today on the left side of the neck. Please monitor closely for the next 1-2 days for signs of lethargy, decreased appetite, fever, or swelling of the injection site.

<b>Next Wellness Exam: January 2023</b>
---

### Plan:

1. Bute, 2 grams orally once a daily for 10 days.
2. Adequan: 5cc IM once every 4 days for 7 treatments
3. If there is no improvement, further treatment
