Performance Horse Wellness Program: Spring Visit

Plan:

	Recommendation/Treatment
Physical Exam:	All aspects of the physical exam were considered within normal limits. This is great!
Nutritional Consult:	Based upon body condition score, please keep the current diet as it seems to suit him well.
Dental Exam and Float:	No dental power-float was performed today based upon the dental evaluation, we recommend to float at the next wellness visit in 6 months.
Diagnostic Blood Profile:	We will perform a diagnostic blood profile at his next visit in the fall.
ACTH/Insulin Test:	No ACTH/Insulin test was performed at today's visit
Coggins:	We will perform a coggins test at his next visit in the fall.
Fecal Parasite Analysis:	If Jazz has not been dewormed in the past 6 months we recommend deworming with QuestPlus
Sand Sedimentation Test:	No sand was noted in feces or on auscultation of the abdomen today, great!
Soundness Exam:	There was no notable lameness today, yay! Jazz is in great musculoskeletal condition!
Hoof Radiograph and Balance:	We will perform his hoof radiographs at his next visit in the fall. continue with current shoeing prescription.
Vaccination:	Jazz was vaccinated today on the right side of his neck. Please monitor closely for the next 1-2 days for signs of lethargy, decreased appetite, fever, or swelling of the injection site.

Next Wellness Exam: September 2023

Thank you for entrusting us with Jazz's preventative and wellness care! If you have any further questions or concerns feel free to call us at any time.
